

Prepared for February 27 and 28<sup>th</sup> meeting of Advisory Committee on Immunization Practices by Judy A. Mikovits, PhD

I registered to give public comment at the meeting but did not win the lottery to speak. Therefore, as directed, I am submitting these written comments. I have a PhD in Biochemistry and Molecular Biology from George Washington University. I am an expert in the development of Biological Therapeutics/Immune Therapy spending 22 years at the National Cancer Institute in Frederick Maryland and directed the Lab of antiviral Drug Mechanisms (NCI/DTP/LADM) for HIV/AIDS associated malignancies from 1999-2001 prior to moving to industry. I currently co-own a consulting company, MARC Inc. in Carlsbad CA with Dr. Francis W. Ruscetti. As collaborators for almost 35 years, we have dedicated our adult lives doing basic research to understand the innate and adaptive immune responses to infection. We have translated that knowledge into therapeutic strategies for treatment of cancer, autoimmune and neuroimmune diseases. We have learned the immune system is not static, it changes with age according to exposure to environmental toxins, infections, antibiotics and vaccinations.

Since 2015 Dr. Ruscetti and I have been providing expert testimony for vaccine injury cases in the national Vaccine Injury Compensation Program. This Program is directed by Captain Narayan Nair, MD. I was disturbed to hear Dr. Nair's update on the program presented to the committee on February 28<sup>th</sup>, 2019. He reported large increases in claims filed in the program with 1243 claims filed in FY 2018 with 226 million dollars awarded in compensation and 26.9 million paid in attorney's fees. This was an increase from the previous fiscal year of 411 claims with 74.4 million awarded. Dr. Nair reported that because of the increased claims there is a backlog of 726 claims. He went on to say between 2006 and 2012 there were 6000 claims and of those 70% were compensated. He stated that since 3.4 billion doses were given during that time period then 1 million doses equals 1 compensated claim. This is a highly misleading statement suggesting erroneously that there is only 1 Injury justifying compensation per 1 million doses of vaccine. Nothing could be further from the truth and the public is continuously being misled.

Our experience working in this program is that is horribly corrupt. So much so that in 2018 MARC Inc. hired Michael R. Hugo as a consultant on vaccine policy and history.

Michael R. Hugo is a former attorney, now working in the area of public health policy and research. While in practice, Mr. Hugo was a pioneer of vaccine litigation dating back to the early 1980s. He was heavily involved in the lobbying, drafting, and implementation of the National Childhood Vaccine Injury Compensation act of 1986. He tried the first case tried in the vaccine court and has stayed involved in vaccine related issues both as an attorney and more recently as a public health policy researcher.

As he writes in the attached Position paper on the Vaccine Act. The Entire System Is broken due to Conflicts of interest at every level and the HHS and DOJ doing everything they can to prevent victims from receiving just compensation for the very real and not at all rare injuries caused by the current vaccination schedule.

Special Masters in this program not only bully the victims but have refused to pay Drs. Mikovits and Ruscetti and have threatened attorneys who hire us to provide expert witness that they will not only rule against their clients but also will not pay attorney fees.

This is blatantly against federal law and Dr. Nair admitted as much in his update to the ACIP yesterday. Just as Dr. Tony Fauci lied in Congress on February 27 with respect to MMR causing neuro-inflammation, it appears that nothing about the ACIP has anything to do with truth and everything to do with protecting the wealth of public officials and the only immunity provided by the current vaccination schedule is the immunity for the manufacturers inoculating innocent victims with toxins and infectious and transmissible animal and human retroviruses while covering up these crimes causing the public to be deceived just as Drs. Nair and Fauci lied in order to cover up the fact that the cause of the explosion of autoimmune disease, cancer, neurodevelopmental, neurodegenerative diseases is the current vaccination schedule.
